North Carolina Wildlife Resources Commission
Research Idea Submission Form

[PI name, Institution]

[Research Title]

Research Need
Briefly describe the background (system/species description), relevant work that has been accomplished previously, and the current need for new or additional research. This section should not exceed two paragraphs.

Proposed Work
In one to two paragraphs, describe the proposed work, including research questions, objectives, hypotheses, and any preferred methodologies. Address how this work may impact management.

Anticipated Benefits
Briefly describe how this work will further the mission of the NCWRC in conserving and managing our natural resources.

Anticipated Research Deliverables Examples include:
- Quarterly progress reports
- Final report
- Final presentation
- Raw Data
- Products
- Management Recommendations

Proposed Timeline
What is the proposed project time to completion? Include an outline of project schedule if possible. Address any critical timepoints that will need to be considered for field work, staff availability, etc.

Proposed Budget
What is the projected overall cost for this project? A detailed line-item budget is not required at this time. Note that a 25%-35% nonfederal match may be required, depending on fund source.
